## Session I: Incident Response to Terrorist Bombings – Operations **PER-230**

Designed to prepare emergency responders to perform effectively and safely during bombing incidents, principally in support roles within the warm and cold zones of the incident scene. Familiarization with improvised explosive devices (IEDs) and explosive materials and detailed training on critical response actions during pre-and post detonation operations. In addition, the course addresses actions that emergency responders can take to prevent and/or deter bombing attacks against targets in their communities.

### Course Objectives

- Prepare emergency responders to perform critical response actions during pre- and post-detonation incidents involving terrorist use of energetic materials (explosives and incendiaries)
- Provide emergency responders with techniques to prevent and/or deter terrorist attacks involving energetic materials
- Instill in participants a respect for the destructive potential of energetic materials that may be used in terrorist attacks

## Session II: Prevention of and Response to Suicide Bombing Incidents **PER-231**

Provides training on the suicide bombing threat. Includes familiarization with improvised explosive devices (IEDs) and explosive materials typically used in suicide bombings. It also addresses actions that individual emergency responders can take to assist in preventing or deterring suicide bombings as well as techniques, tactics, and procedures that support an effective and safe response to a suicide bombing.

### Course Objectives

- Provide participants with the skills and knowledge necessary to identify and report pre-attack indicators
- Participate in an integrated response to a suicide bombing using safe and effective techniques, tactics, and procedures.

Target Audience: Law Enforcement, Fire Service, EMS, Public Safety Communications

Costs: Tuition and course materials are free. Students are responsible for travel, meals, and lodging.
