

Unusable, Inaccurate, and Inaccessible Floor Plans

According to the [Texas House Committee on Youth Health and Safety](#) report on the Uvalde incident, "**the schematic maps of the campus design used by law enforcement to identify potential points of entry were inaccurate.** They wrongly depicted classrooms 111 and 112 as sharing a wall with the library, when in reality, the back walls were flanked with windows. Law enforcement officers testified to the Investigative Committee that they asked whether they could gain access to the classrooms through windows but were deterred by the inaccurate plans." (Page 40-41 *Uvalde After Action- Youth-Health-& Safety-Committee-Interim-Report-2022*)

According to the after-action report by the [Connecticut State Police](#) after the Sandy Elementary incident, “When officers conducted initial and subsequent searches of the school... **neither floorplans nor schematics of the school were readily available for tactical team search units.**” (Page 22, *Sandy Hook After Action Report- Connecticut State Police*)
