Sample Threat Assessment and Management Forms

The following pages provide sample forms to help schools document information related to all aspects of threat cases, from initial report/intake, triage, assessment, initial case management, case updates and case closure. Note that schools are NOT required to use these forms. Rather, they are provided as a resource to support schools in their efforts to identify, assess and manage potential threats to the school and its members.

All the forms are also available on the DCJS website at:

www.dcjs.virginia.gov/virginia-center-school-and-campus-safety/threat-assessment-virginia

The forms are available for use in a downloadable PDF format to be used as they are, or in a WORD format.

School threat assessment teams are encouraged to download the forms, edit them to meet their policies and procedures, and use them as best meets their needs. Teams may use all, some, or none of these forms and may edit them to meet local needs.

Overview of Threat Assessment and Management Forms

Part I: Intake for Initial Report Concerned

This form is to document initial reports. The first page is to document the incident/concern that occurred. The items about the incident are intended to gain a full understanding of what occurred and if there are any obligations for further notifications.

The next two pages are to document the persons involved in the potential case, i.e., the subject(s), target(s)/others impacted, and witnesses. If necessary, use additional copies to document information about additional persons involved.

Part II: Triage

This form has three pages. The first is for documenting standard record checks. Note these items should be updated to reflect the record sources and access of the school's threat assessment team. The second page is a summary checklist of key issues for consideration of need for further assessment or intervention. The purpose of the triage is to determine if there is need for further review and action by the full team or if the concern can be reasonably resolved at triage or by referral to existing resources. The third page is for documentation of any required notifications, additional information, and the findings of the triage process.

Part III: Threat Assessment

There are two pages for this form which provides key areas for inquiry regarding each of the STEP domains, and a checklist of key factors that will inform assessment and case management considerations. The key areas and items reflect the content of the Guidelines for Threat Assessment in this *Guide*. This form may also be used to update key areas/information during ongoing case reviews.

Part IV: Initial Case Management Plan

This form uses the STEP framework to outline the case management plan. The teams should identify tasks, team members responsible for overseeing completion of the tasks, and a date/time the task is due for update to the team.

Part V: Case Update

Like the initial Case Management form, this uses the STEP framework for modification to the case management plan, including both updates such as new information or outcomes of prior action items, and new or ongoing tasks for each of the domains. The teams should identify tasks, team members responsible for overseeing completion of the tasks, and a date/time the task is due for update to the team. This form can be used to document each review of the case.

Part VI: Case Closure

Teams may use this form to document a thorough, diligent and deliberate review of the case to ensure that any concerns using the STEP framework have been sufficiently addressed to the point that the case is stable at a Routine/No Known Concern or Low Level of Concern.
