2022 Virginia School Survey of Climate and Working Conditions — STUDENT VERSION—Grades 9 through 12 STATEWIDE School Participation Snapshot

Welcome to Statewide Snapshot for the 2022 Virginia School Survey of Climate and Working Conditions, Student version. This report summarizes how your students responded to the survey in aggregate.

We received responses to this survey from 219233 students, which equates a response rate of 54.2%, and unless otherwise noted, that is the total number of responses for each question.

Some survey items (e.g., race) are not exclusive, meaning respondents may elect to mark multiple response options resulting in an item whose sample size may appear larger than the total sample size. Other items may have smaller sample sizes that result from survey branching, meaning they are only asked of some individuals based on a response to a previous item.

As you read through the results below, each question (or block of questions) will report the percentages of how the questions were answered (Percentage) and the subtotal (Count) for each response type.

For example:

Option	Count	Percentage
This is my first year at this school.	220	21.6%
This is my second year at this school.	240	23.5%
This is my third year at this school.	260	25.5%
This is my fourth (or more) year at this school.	300	29.4%

When a percentage is shown with parentheses, the number inside the parentheses represents the subtotal (count). For example, 5.0% (10) means that 5% of the respondents from your school, represented by 10 individuals, chose that option.
